

strategies in the classroom

Nov.12th, 2023 (Sunday)

1/do not allow being interrupted in class while teaching and do not allow interruptions from outside the classroom (most times these are unnecessary)

2/do not accept all corrections to your speech on the pupil's side

3/use handbooks

4/think

5/read

6/make notes

7/control the whole group, that is, keep an eye on your students continually

8/if there is some noise in the classroom, ask for silence without shouting. If there is some more noise, clap your hands in demand of silence. If there is still some more noise, speak to pupils in low voice

9/do not respect pupils too much (pupils are not your peers)

10/never carry the weight of bad memories in your head because your head is a part of yourself

11/ speak English

12/ use dictionaries as a rule of thumb

13/ move around the classroom
